PROFESSIONAL SUMMARY

Full-stack web developer with a strong foundation in both front-end and back-end technologies, combining technical expertise with problem-solving skills gained from software analysis and IT programming roles. Proficient in building responsive, secure, and scalable applications using modern frameworks and tools.

TECHNICAL SKILLS

Languages & Frameworks: HTML5, CSS3, JavaScript, PHP, Node.js, React.js, Express.js, Handlebars.js, SQL, MySQL, MongoDB, Sequelize, Symfony, Twig

Tools & Platforms: Git, Vite, Playwright, Panaya, Nodemailer, JWT, Bcrypt, Tachyons

Methodologies: MVC Architecture, RESTful APIs, Responsive Design, Test Automation

PROFESSIONAL EXPERIENCE

IT Programmer Analyst I - Werfen, Bedford, MA (June 2022 - August 2025)
- Enhanced internal applications with new UI features using PHP, Symfony, React, and Twig templates.
- Integrated signature capture into personalized emails, improving client engagement.
- Developed backend enhancements for managing diverse content types and ensuring data consistency.
- Increased reliability with automated testing using Playwright and cross-platform validation via Panaya.

Software License Analyst - USU Solutions, Allston, MA (December 2018 - June 2022)
- Analyzed and reconciled complex software license data for vendors including Microsoft, Oracle, and IBM.
- Resolved licensing discrepancies, improving data accuracy and compliance.
- Partnered with clients to streamline license management and reduce audit risks.

PROJECTS

New Hampshire Crowd Funding - React.js, Express.js, Node.js, MongoDB, JWT, Vite, Bcrypt, Tachyons
- Full-stack MERN application with secure JWT authentication.
- Users can create, follow, and contribute to projects, with bcrypt securing credentials.

Book Reviewer - Handlebars.js, Express.js, MySQL, Sequelize, Nodemailer, Bcrypt
- Book review platform with search, ratings, and reviews powered by an external API.
- Email notifications implemented for improved user engagement.

Recipe Sharing Hub - React, Apollo Client, Node.js, Express.js, GraphQL, Apollo Server, MongoDB, JWT
- MERN application to create, browse, and share recipes. GraphQL API, and scalable MongoDB models.
